

TEYMUR BABAYEV

Senior React Engineer
Full Multi-Stack Architect Level Developer

Profile

Well, I wasn't clear about my future, but I knew programming was right for me. Learning programming takes a lot of time and efforts, but it will depend on how hard I am working and on how hard I am practicing. Where there is a will, there is a way! This was seems hard at first, but when I knew the ropes, it was very easy and very interesting. As a passionate and skilled and sincere Senior Full Stack developer with 9+ years of hands-on experience who is always dissatisfied with myself, learns humbly, and has the spirit of completing to the end what I starts.

Work Experience

B2X.tech (www.b2x.tech) 2021 – 2023

Senior Full Stack Engineer | Shopify, Shopping and E-commerce website
Knowledge of web technologies such as React.js, Redux.js, Next.js, ASP.NET MVC, ASP.NET CORE, AWS, WEBRTC, SEO, RESTFUL API, Blockchain.Unity3D.

Informa Services 2020 – 2021

Full Stack Developer | MERN Stack | Node.js, Next.js, AWS, Unity, MySQL, Blockchain

Working with highly challenging projects like (asanlogin.my.gov.az, my.gov.az) creating front and some backend modules for getting the best optimized user experience and fast data transformation as possible and dynamic conversion of old soap services to rest service and provided this to all clients and organizations of government of Azerbaijan.

In the blockchain domain, I contributed to a decentralized application (dApp) by designing and deploying smart contracts on Ethereum. I implemented tokenomics, NFT minting, and wallet integration, focusing on gas optimization and security against exploits.

Additionally, my hands-on experience in Unity3D includes developing interactive applications and games with immersive environments. I collaborated with designers to create realistic physics-based simulations and VR experiences.

Jar Creative 2019 – 2020

Full Stack Developer | React, Redux, Node.js, PHP, ASP.NET MVC, MongoDB,

I got my first experience in Angular, React for UI development and SPA world. Worked with Express.js for more elegant way of the Node.js in backend development. Learned some of the tricks of JS to handle dynamic environments and non-blocking world of single-thread I/O. Build many web pages and real web apps like e-commerce some fin-tech solutions and more.

I am also skilled in SEO and performance optimization, ensuring web applications rank competitively and deliver exceptional loading speeds. For instance, I reduced page load times by 30% in a content-heavy website through code splitting, lazy loading, and optimizing asset delivery.

In backend development, I have worked extensively with ASP.NET MVC and ASP.NET Core, designing and deploying robust RESTful APIs that integrate with various frontend frameworks. I successfully implemented scalable solutions for e-commerce and enterprise-level platforms, including secure payment gateways and real-time data processing using WebSocket.
